News Releases

9 February 2015

After more than one year evaluation, SERIS announced the final eight winners with nine designs to participate in one of the World's biggest multiple floating PV test-bedding projects. In this project

DRAKOO-B

World first small waves energy converter

Drakoo Type-B developed for small wave energy conversion.

Introduction

Hann-Ocean Energy's (HOE) wave energy converter (WEC) Drakoo (Dragon King of Ocean) has the potential to revolutionise the global wave energy market in both shallow and deep seas. Drakoo can extract energy at significantly lower cost compared to other existing wave technologies, giving it an enormous competitive advantage in the rapidly growing wave energy sector.
